

Elevate Construction Quality with Building One

Are you a licensed architect or professional engineer with a passion for ensuring top-notch construction quality? Building One invites you to join our team as a Project Manager. Here, your expertise will drive projects that set new standards in construction quality, building enclosure, waterproofing, and accessibility. This is your opportunity to make a tangible impact on the construction industry nationwide.

Lead High-Quality Projects with Precision

Join Building One as a Project Manager and take the helm of innovative building projects. You will conduct comprehensive pre-construction reviews, ensure meticulous construction quality through regular site visits, and manage vital relationships with contractors, developers, and investors. Your keen eye for detail and strategic oversight will ensure that buildings are not only built better but are also more resilient and more accessible.

Your Role and Unique Contributions

What You'll Be Doing

In-Depth Pre-Construction Reviews: Conduct thorough analyses of design documents to ensure compliance with building codes and project specifications, focusing on building enclosure and accessibility.

On-Site Quality Assurance: Perform regular site visits to monitor construction quality, ensuring adherence to the highest standards and producing detailed reports to keep stakeholders informed.

Comprehensive Project Management: Act as the primary contact for project owners, seamlessly navigating the complexities of project execution and stakeholder communication.

What Sets This Role Apart

Focus on Quality Control: Unlike typical roles, this position emphasizes the importance of design and construction quality with heavy focus on building science, waterproofing, and accessibility, ensuring projects meet stringent quality standards.

Autonomy and Flexibility: Manage multiple projects independently, leveraging your expertise to meet diverse client needs while maintaining high-quality outcomes.

Nationwide Impact: Influence significant projects across the country, with opportunities for travel that broaden your professional experience and enhance your career.

The Value You'll Bring

Expert Consultancy: Utilize your deep knowledge of building systems and construction methodologies to deliver unmatched consultancy services that prioritize design and construction quality.

Leadership and Collaboration: Foster collaborative relationships with a wide array of professionals, enhancing your leadership skills and expanding your professional network.

Continuous Improvement: Engage in a culture that values lifelong learning and intellectual curiosity, with regular opportunities to advance your knowledge and skills in construction quality control.

Ensure Excellence in Construction with Us

Ready to raise the bar in the building industry? Apply now by sending your resume and a cover letter detailing how your unique skills and experiences align with our mission at Building One. Highlight your commitment to quality and your ability to manage complex projects with precision.

Minimum Position Requirements

Professional Experience: At least 7 years in building design and/or construction, with a strong focus on technical expertise and quality control.

Communication Skills: Outstanding written and verbal communication skills, particularly in producing detailed reports.

Travel Availability: Willingness to travel regularly, including overnight stays, to ensure project success.

Starting Salary: \$90,000 - \$110,000, based on experience.

Apply: Send your resume and cover letter to dana.barton@building-one.com. Use your cover letter to highlight how your skills and experiences make you the perfect fit for our team.
